

Textile Products

Free movement of goods is ensured by the harmonisation of technical regulations at European level and, where the legislation is not harmonised, by the principle of “mutual recognition”. Below is information relating to textile products.

Scope

Textile products mean any raw, semi-worked, worked, semi-manufactured, manufactured, semi-made-up or made-up products that are exclusively composed of textile fibres, regardless of the mixing or assembly process employed (weaving, knitting, non-woven, etc.).

Textile fibre means:

- a) A unit of matter characterised by its flexibility, fineness and high ratio of length to maximum transverse dimension, which render it suitable for textile applications
- b) Flexible strips or tubes, of which the apparent width does not exceed 5 millimetres, including strips cut from wider strips or films, produced from the substances used for the manufacturing of other non-natural fibres

The following are also subject to this regulation:

- a) Products containing at least 80% by weight of textile products
- b) Furniture, umbrella and sunshade coverings containing at least 80% by weight of textile components; similarly, the textile components of multi-layer floor coverings, of mattresses and camping goods, and warm linings of footwear and handwear
- c) Textiles incorporated in other products and forming an integral part thereof where their composition is specified

Regulations

Regulation is harmonised at European level

European regulation

[Regulation \(EU\) No 1007/2011](#) on textile fibre names and related labelling and marking of the fibre composition of **textile** products.
